

## Decision Support

### ***DECISION-MAKING MADE EASY***

The Discovery EIS application is powerful decision support solution designed to effortlessly increase decision making confidence by allowing complete analysis of variances, profits and losses, and balance sheet items. This system provides continuous access to live and historical transaction data that dynamically expands your ability to make superior decisions faster.

Through our unlimited user licensing model, you can offer Discovery EIS to every member of your organization and allow them to view all financial reporting online in a truly paperless environment. Best of all, it follows the Microsoft Excel™ user interface look and feel, allowing a reduced learning curve during implementation with formulas and functions that are as familiar and comfortable.

### **Discovery EIS**

*Business intelligence at your fingertips*

Discovery EIS puts every bit of financial and statistical data at your fingertips—in a user-friendly format you specify—no matter when, where, and how you need it.

### **The power of integration**

- Significantly increase decision making accuracy and confidence
- Reduce costly errors, paperwork, data rekeying, delays, and costs
- Instantly access account source and transaction details Business intelligence at your fingertips

### **The functionality you need**

Discovery EIS enables you to instantly access real-time and historic transaction data and generate the reports you need 24/7.

- Instant drill-down access to transaction details
- Simplified consolidated reporting
- Allow tracking of key metrics for fully informed decision making
- Track workload statistics alongside financial information
- Easily analyze budgets and export/import finalized budgets to and from the general ledger

### Flexible report creation and queries = fast pay back on your investments

Save time by building a single report and grant the appropriate users access by department. This allows you to structure your report access by organization hierarchy; multiple report copies need not be manually distributed to individuals.

- Access up-to-date financial data in simple queries
- Immediate investment pay back without IT intervention
- Simplified linking formulas to GL that allow users to generate custom reports in minutes
- Instantly drill-down to the source transactions, attachments, and subsystem activity
- Use wizards for speedy initial set up Reporting to board of directors and external bodies
- Easily build consolidated reports from account groups created in the GL
- Compatibility and shared standards with Microsoft Excel
- Reduces report maintenance
- Professional appearance with extensive graphing and formatting capabilities

### Everything you need with one click of a button

With an easy to use spreadsheet-style interface, Virtuo MIS Discovery (EIS) offers continuous access to live and historical data transactions. Through its unique drilldown abilities, you can analyze, export, and import budget information with a mouse click. Easy, efficient, and eco-friendly, Virtuo Discovery EIS provides the tools to help.
