

Asset Management

COMPREHENSIVE MANAGEMENT OF THE COMPLETE ASSET LIFE CYCLE

The comprehensive Virtuo MIS Asset Management toolset automates fixed asset management (depreciable, non-depreciable, capital, and others) through the complete asset life cycle—acquisition, depreciation, and disposal.

With a mouse click, Virtuo MIS Asset Management automatically creates journal entries for the appropriate accounts and allocates expenses to assets' associated departments.

Comprehensive Program for Depreciable and Non-Depreciable Assets

- Use Virtuo MIS Asset Management for minor equipment (equipment expensed in the year of purchase) and capital equipment
- Record detailed information about an asset, including vendor, purchase order, cost, physical location, associated assets, budget, project, and useful life
- Easily access information (i.e., cost and depreciation start date) to automatically calculate monthly depreciation on assets
- Reduce errors with automatically generated fixed asset continuity schedules

Powerful integration with Virtuo MIS Materials Management

Virtuo MIS Asset Management integrates with Materials Management to ensure accuracy and remove redundant data entry. Purchased assets are automatically integrated into the Asset Management sub ledger to facilitate accuracy throughout both systems. Asset information, such as useful life and depreciation, flows from purchase orders to Asset Management automatically, eliminating the need to rekey information continuously.

Flexible Setup

- Record depreciation centrally or allocate it to the asset's associated department
- Easily import historic assets over multiple periods after system initialization
- Calculate monthly depreciation automatically
- Group, subgroup, and associate assets with any budget or project
- Customize asset records with up to 10 user-defined fields
- Transfer and dispose assets en masse

Comprehensive Reports

Asset Management

- On-demand, pre-built reports provide asset information by site, location, cost center, or asset group
- Detailed reports allow for informed development of asset management strategies

Effortless asset tracking

Virtuo MIS Asset Management is a comprehensive tool that tracks the whereabouts of your facility's assets with a mouse click. By thoughtfully automating asset management tasks that are traditionally error-prone and time-intensive, Virtuo MIS Asset Management brings efficiency, effectiveness, and peace-of-mind to your department.

About MediSolution

Founded in 1974, MediSolution, a wholly-owned subsidiary of Harris Computer Systems, is a leading information technology company, providing ERP software, solutions and services to healthcare and service sector customers across North America.
