

Supply Chain

POWERFUL AND INTEGRATED SUPPLY CHAIN FUNCTIONALITY FOR HEALTHCARE

Healthcare faces a resource shortage in the wake of escalating demand for excellent, timely patient services. Finding a way to manage this growing demand is important to everyone if we're to protect and improve healthcare, and the supply chain process—from source to settlement—is the ideal place to start.

Virtuo MIS Supply Chain Management

Virtuo MIS Supply Chain Management, a part of the award-winning Virtuo MIS healthcare software solution, presents the total supply chain in a robust and easy-to-use environment, empowering your staff with built-in best practices.

Virtuo MIS Supply Chain Management emphasizes and makes apparent the process efficiencies needed to:

- Reduce the loaded cost of healthcare supplies
- Reduce wasted time and dollars on inefficient, manual processes
- Improve staff productivity and morale
- Enhance patient outcomes

Powerful Integration and Thoughtful Automation

All Virtuo MIS software suites, including Supply Chain Management, are designed from the ground up with powerful integration and thoughtful automation, ensuring a seamless transition to improved, best practice supply chain processes.

All data is centralized and automatically moved through the system as required:

- Key in a requisition request and Virtuo MIS compares items, quantities, and costs to user-defined approval hierarchies to determine whether to issue from stock or forward the requisition to purchasing
- Create purchase orders from approved requisitions and send to any vendor with an email address
- Receive goods and automatically populate stores
- Use a fully-featured returned goods memo application to create vendor returns and automatically adjust stock
- Reconcile invoices with a few mouse-clicks instead of chasing paper trails

Total Control

Using Virtuo MIS Supply Chain Management, supply chain costs are reduced by automating and integrating the requisitioning, contracting, purchasing, reconciliation, and payment processes. Consolidated supply chain management—centralized contracting, purchasing, warehousing, and payables, with decentralized receiving—increases negotiating leverage, keeps inventory levels down, and reduces stock-outs.

Full integration with Virtuo MIS Finance Management and the Virtuo MIS (xchange) e-Commerce Services ensures an up-to-date accounting system.

Ultimate Peace of Mind

With Virtuo MIS Supply Chain Management, you're running a robust, rock-solid supply chain system that will never let you down.

- Fully customizable data filtering (by user or type of user) keeps everyone focused— across multiple sites and organizations— without information overload
- Stay fully informed at all times and trust every number, with deep drill-down to the source of every transaction
- Complete audit trails ensure you can track every action

Award-Winning Software

Virtuo MIS Supply Chain Management has the commendations to back itself up:

- Best Supply Chain Management System: Intelligent Enterprise Readers' Choice Award, 2007
- Supply Chain Software Award: Supply Chain Asia Logistics Awards, 2007
- Best Supply Chain Software Solution Provider: Supply Chain Excellence Awards organized by SCM Logistics World, 2006

Leading the Industry

MediSolution employs forward-thinking, healthcare supply chain experts with the skills, experience, and vision to design the best supply chain management software in the industry:

- Unlike competing products that force organizations to make compromises between functionality and integration, only Virtuo MIS offers best-in-class modules with seamless integration
- Unlike competitors that force organizations to choose between the benefits of on-demand products and on-premises deployments, only Virtuo MIS gives you the flexibility to choose on-demand, on-premises, or any preferred combination
- Unlike competing products that create extra manual work and errors in the sourcing processes, only Virtuo MIS lets buying experts automatically create sourcing events from requisitions or expiring agreements, and only Virtuo MIS lets you negotiate with a click; competitors force you to use the clipboard
- Unlike competing products that force rigid centralization or decentralization, only Virtuo MIS provides true center-led procurement by decoupling the physical and logical location of key procurement activities

About MediSolution

Founded in 1974, MediSolution, a wholly-owned subsidiary of Harris Computer Systems, is a leading information technology company, providing ERP software, solutions and services to healthcare and service sector customers across North America.

Over 400 healthcare, public and service sector organizations rely on MediSolution's systems to maximize their operational efficiencies, lower their costs and improve the delivery of services.
