MediSolution

System Management

SYSTEMS MANAGEMENT SIMPLIFIED

- Complicated or decentralized IT systems management?
- High level of technical skills required?
- Time-consuming software installation and upgrades differ program to program?
- Frequent software failures and application downtime?
- Database administrator workload issues?

MediSolution can help

Virtuo MIS Systems Management software equips staff to manage the technical aspects of all Virtuo MIS applications from a single location. In addition to managing upgrades for dozens of Virtuo applications from a single install program, Virtuo MIS Systems Management provides built-in tools and wizards that automate all standard database administrator functions.

The superior integration and power of Virtuo MIS Systems Management dramatically reduces the amount of resources required to maintain all of your Virtuo MIS software. It makes it easy for non-IT people to take on much of the task. Virtuo MIS Systems Management software is included with all Virtuo MIS software solutions.

- Effortlessly install and manage Virtuo MIS upgrades from a single setup program
- Enjoy superior integration and power in a robust computing environment
- Easily update all databases on the server
- Automatically update client workstations where and when required
- Save time and reduce work and errors by having a single location for defining security access, managing database location, version, and managing multiple data schemas or instances of the data
- Easily and quickly create extensive activity reports with a click of the mouse
- Use table management utilities to perform data audits and update balance files Increase efficiency
- Significantly reduce resources required to maintain your software
- Allow non-IT staff to maintain Virtuo MIS software in order to free up internal IT resources
- Reduce reliance on (and eliminate the cost of) external contractors
- Install and maintain multiple Virtuo MIS products easily, quickly, and inexpensively
- Enjoy trouble-free computing, with reliable data, database, and software security
- Protect against the impact of unrecoverable server errors

Security Manager

Set and Maintain Security Levels from One Easy Location
- Define security access for all Virtuo MIS applications and modules from a single location
- Easily set security levels for modules and functions where applicable
- Monitor and quickly generate software login activity reports

Server Update Wizard and Data Manager

Easily Upgrade and Manage Databases

- Automatically upgrade databases on your server effortlessly
- Maintain all table definitions within each database without a database administrator.

For each Virtuo MIS application, easily manage:
- Data tables
- Database location
- Version control
- Testing environments (easy to set up)

Schema Location Editor

- Manage multiple data schemas or instances of data from a single location

System Manager

The First Aid Kit for Databases

This Virtuo MIS program is used only when instructed by a Virtuo Product Support Specialist. It provides table management utilities that perform data integrity audits and can repair balance files in the Virtuo MIS system in the unlikely event of a database failure (e.g., if a hardware issue causes corruption in your data structures).

Virtuo MIS Setup

One Location for all Interfaces

Use this feature to setup and maintain Virtuo MIS interfaces. With Virtuo MIS Setup, you can:
- Setup and import AR information
- Review, edit, or delete charges

- Setup and import AP information
- Setup HL7 options

Virtuo Messaging

Stay in the Loop

An optional component of Virtuo MIS SMS, Virtuo Messaging allows Virtuo Requisitioning users to:

- Receive personal alerts without logging into Virtuo Requisitioning
- Send important alerts to Virtuo Requisitioning users
- View new requisition requests
- Inform requisitioners of denied requests
- Customize the frequency of alerts

Schema Location Editor & XML Location Editor

Easy Set Up

The Schema Location Editor and the XML Location Editor are used to set up schema location information in text and XML format. Both modules can be used to:

- Manage multiple data schemas or instances of data from a single location
- Easily set up testing environments

Efficient and intuitive, use the built-in tools and wizards of Virtuo MIS Systems Management Suite to simplify managing technical aspects of Virtuo MIS applications, ultimately saving time and reducing resources needed for software maintenance.

About MediSolution

Founded in 1974, MediSolution, a wholly-owned subsidiary of Harris Computer Systems, is a leading information technology company, providing ERP software, solutions and services to healthcare and service sector customers across North America.

Over 400 healthcare, public and service sector organizations rely on MediSolution's systems to maximize their operational efficiencies, lower their costs and improve the delivery of services.
